DIRECTIONS

- Place 4 of one type of coins (markers) on each of your Home circles.
- Roll the dice. If you roll a 6, move one marker out of Home onto the Start circle and roll again.
- Each time you land on an exercise space, chose and complete an exercise from the matching category.
- If an opponent's coin occupies a space you move to, you take their space and move their coin back to their Home.
- You may only have one coin on one space at a time.
- You must have the exact number to move your coins into the Finish line.
- The first player to get all their coins in their Finish line WINS!
